Click on **Control Panel**, **Regional and Language Options** and select **Language** tab

Check **Install files for East Asian Languages**
Under **Advanced** tab, select **Chinese (Taiwan)**.
Under Languages tab, click on Details button and add "微軟新注音輸入法 2002a" as input Keyboard.

For this screen, you can also replace with the one on the end page. (recommend)
Highlight 微軟新注音輸入法 2002a and click on Property and…..
And setting as following.
After setting, then click on the Keyboard Mapping, select HanYu Pinyin.
Back to Settings, click on **Language Bar Setting**. Set it as...
On the **Key Settings**..., don’t change anything.
******** Replacement for the P3 and P4. ********
