# Unit 3 : Addition

## Friendly Notes

### Addition

Addition means **putting together**.

Let us make an addition story.

We put together  
4 rulers and 3 rulers  
to get 7 rulers.

There are **4** long rulers.  
There are **3** short rulers.  
There are **7** rulers altogether.

We can count on to add the number of rulers.

Begin with 4 and count on to 5, 6 and 7.

We can use number bonds to show addition.

We write the number sentences:

$$4 + 3 = 7$$

$$3 + 4 = 7$$

Add 4 to 3.

Add 3 to 4.

The answer is 7.

$$4 + 3 = 7$$

"Four plus three equals seven."

$$3 + 4 = 7$$

"Three plus four equals seven."

'+' means 'add'.

'=' means 'equal'.

## Unit 4 : Subtraction

### Friendly Notes

#### Subtraction

Subtraction means **taking away**.

Let us make a subtraction story.

Cross out 5 cakes.

There are **9** cupcakes.  
Jack eats **5** cupcakes.

We write the number sentence:

$$9 - 5 = 4$$

Subtract 5 from 9.  
The answer is 4.

We say:  
“Nine minus five equals four.”

‘-’ means ‘subtract’.

## Methods of Subtraction

We can use number bonds to show subtraction:

$$9 = 4 + 5$$

$$9 - 4 = 5$$

$$9 = 5 + 4$$

$$9 - 5 = 4$$

We can count backwards to subtract.

Subtract 4 from 10.

## Unit 5 : Position

### Friendly Notes

#### Position

We use these words to say where things are:

**above**    **below**    **next to**    **left**    **right**

Study this picture.

The birds are flying **above** the clothes line.

The cat is sitting **below** the clothes line.

The skirt is **next to** the overalls.

The T-shirt is also **next to** the overalls.

The dress is on the **left**.

The pair of shorts is on the **right**.

## Direction

To give directions, we can also count the number of steps to go **left**, **right** or **up**.

Jane and Jack go shopping.  
How do they get to the shops and supermarket?

Supermarket:

Turn **right** and go **1 step**.

Clothes shop:

Go **up 1 step**.

Turn **left** and go **2 steps**.

Shoes shop:

Go **up 3 steps**.

Bags shop:

Go **up 2 steps**.

Turn **right** and go **1 step**.

OR

Go **up 1 step**.

Turn **right** and go **1 step**.

Go **up 1 step**.

## Ordinal Numbers – Naming Position

Ordinal numbers help us tell the position of a person or an object.

Cardinal Numbers	Ordinal Numbers
1	1st (first)
2	2nd (second)
3	3rd (third)
4	4th (fourth)
5	5th (fifth)
6	6th (sixth)
7	7th (seventh)
8	8th (eighth)
9	9th (ninth)
10	10th (tenth)

9th is spelt without an 'e': 'ninth', not 'nineth'.

When we write ordinal numbers, the last two letters of each word are used. For example: 1st (first), 2nd (second) and 3rd (third), 4th (fourth).

Ordinal numbers can be used to name positions from the left or right.

There are 5 fruits.

papaya

pear

apple

banana

orange

Left

Right

If we count from the left:

The papaya is **1st from the left**.

The pear is **2nd from the left**.

The orange is **5th from the left**.

If we count from the right:

The orange is **1st from the right**.

The banana is **2nd from the right**.

The papaya is **5th from the right**.

The orange is **last from the left**.  
The papaya is **last from the right**.

# Exercise 1 : Position and Direction

1. Fill in the blanks.

- (a) Balloon \_\_\_\_\_ is below all the other balloons.
- (b) Balloon \_\_\_\_\_ is next to Balloon G.
- (c) Balloon \_\_\_\_\_ is on the far left.
- (d) Balloon \_\_\_\_\_ is above all the other balloons.

2. Fill in the blanks.

- (a) To eat some cookies, the mouse has to go right \_\_\_\_\_ step(s).

1st

3. Draw.

- (a) A flower in the 5th vase from the right.

- (b) An apple on the 8th table from the left.

# Unit 6 : Numbers to 20

## Friendly Notes

### Counting

These are the numbers 11 to 20.

We learn to count and write these numbers in words.

11 eleven	
12 twelve	
13 thirteen	
14 fourteen	
15 fifteen	
16 sixteen	
17 seventeen	
18 eighteen	
19 nineteen	
20 twenty	

To make bigger numbers easier to count, we can make groups of 10 first.

Count the stars.

Count on from 10:  
10, 11, 12, ... 18

10 and 8 make 18.  
 $10 + 8 = 18$

There are 18 stars altogether.

## Ordering and Comparing Numbers

When we compare two numbers, we check which number is greater and which is smaller.

Which number is greater? Count and compare.

Set A has 15 bees.

Set B has 12 bees.

There are 3 more bees in Set A than in Set B.  
15 is **greater** than 12.  
12 is **smaller** than 15.

can make

from 10:  
... 18

When we compare two numbers, we use these words:

**greater than**

**smaller than**

When we compare more than two numbers, we use these words:

**the greatest**

**the smallest**

9 is smaller than 12 and 16.  
9 is the smallest.  
16 is greater than 9 and 12.  
16 is the greatest.

Set B has the smallest number.  
Set C has the greatest number.

We can arrange numbers in order when we know how to count them in order.

Let us compare these numbers and arrange them in order.

- (a) Begin with the greatest: 13, 10, 8, 4  
(b) Begin with the smallest: 4, 8, 10, 13

## Addition

We can first make 10 to help us add.

Add 8 and 5.

**Step 1:** Add 8 and 2 to make 10.

**Step 2:** Add 10 and 3. We get 13.

OR

**Step 1:** Add 5 and 5 to make 10.

**Step 2:** Add 10 and 3. We get 13.

## Subtraction

We can first make 10, then subtract.

Subtract 9 from 15.

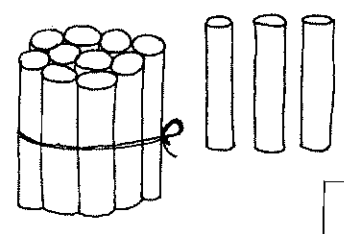

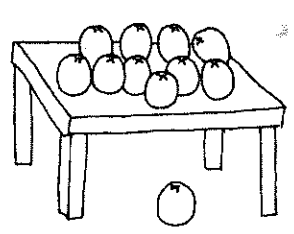

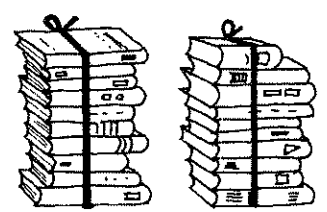

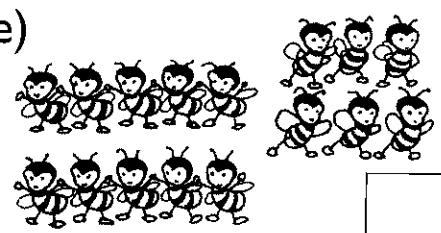

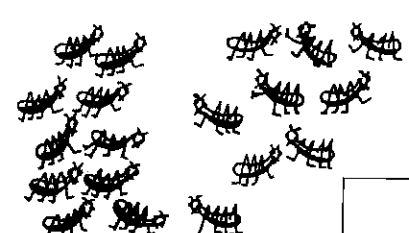

**Step 1:** We make a 10.

**Step 2:** Subtract 9 from 10. We get 1.

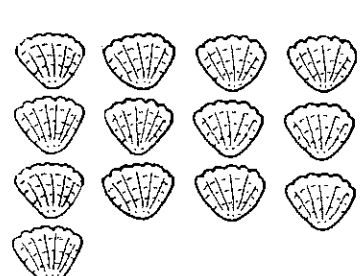

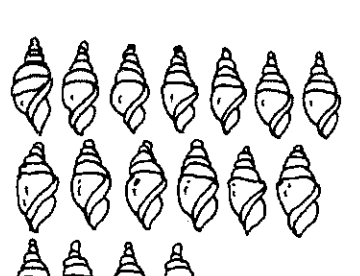

**Step 3:** Add 5 and 1. We get 6.

# Exercise 1 : Counting and Comparing

1. Write the correct number in the boxes.

as light as

lighter than

the lightest

as heavy as

heavier than

the heaviest

This mango **weighs less** than the papaya.

This mango is **lighter than** the papaya.

This papaya is **heavier than** the mango.

The doll and the toy car have the **same weight**.

The doll is **as heavy as** the toy car.

The toy car is **as light as** the doll.

## Measuring Weight

The mango is as heavy as 6  $\square$ .

The alarm clock is as heavy as 4  $\square$ .

The plum is as heavy as 1  $\square$ .

Each  $\square$  stands for 1 unit.

We can say that:

The mango weighs **6** units.

The alarm clock weighs **4** units.

The plum weighs **1** unit.

The plum is **lighter than** the mango and the alarm clock.

The plum is the **lightest**.

The mango is **heavier than** the alarm clock and the plum.

# Unit 11 : Comparing Numbers

## Friendly Notes

### More or Less

We can compare numbers by counting, matching or subtracting.

There are **more** bees than flowers.

There are **fewer** flowers than bees.

How many more bees than flowers are there?

Let us subtract to find the answer.

There are 7 bees.

There are 5 flowers.

$$7 - 5 = 2$$

7 is 2 more than 5.

5 is 2 less than 7.

There are **2 more** bees than flowers.

There are **2 fewer** flowers than bees.

We see that:

2 more than 5 is 7.

$$5 + 2 = 7$$

2 less than 7 is 5.

$$7 - 2 = 5$$

# Exercise 1A : Comparing Numbers

## Unit 12 : Graphs

### Friendly Notes

#### Picture Graphs

We can use picture graphs to compare the number of items.

Caleb has 7 carrots.

Daniel has 2 carrots.

Emily has 4 carrots.

This is how our picture graph may look:

Caleb	
Daniel

or ...

... our picture graph may also look like this:

From the picture graph, we can tell:

Caleb, Daniel and Emily have 13 carrots altogether.

Caleb has **more** carrots than Daniel and Emily.

Caleb has the **most** carrots.

Daniel has **fewer** carrots than Caleb and Emily.

Daniel has the **least** carrots.

## Tally Charts

We can also use a tally chart to show how many carrots Caleb, Daniel and Emily have.

This is how our tally chart may look:

	Number of Carrots Each Child Has
Caleb	
Daniel

Each  stands for 1 carrot.

 is a group of 5.

It stands for 5 carrots.

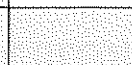

## Bar Graphs

We can also use a bar graph to show the number of carrots each child has.

This is how our bar graph may look:

Number of Carrots Each Child Has		
Caleb	Daniel	Emily
Each  stands for 1 carrot.		

or our bar graph may look like this:

Number of Carrots Each Child Has							
Caleb							
Daniel

# Unit 13 : Numbers to 40

## Friendly Notes

### Counting

These are numbers 21 to 40.

We learn to count and write these numbers in words.

Number	Number in Words
21	twenty-one
22	twenty-two
23	twenty-three
24	twenty-four
25	twenty-five
26	twenty-six
27	twenty-seven
28	twenty-eight
29	twenty-nine
30	thirty

Number	Number in Words
31	thirty-one
32	thirty-two
33	thirty-three
34	thirty-four
35	thirty-five
36	thirty-six
37	thirty-seven
38	thirty-eight
39	thirty-nine
40	forty

We write 40 in words without the 'u': forty.

To count numbers more than 10, we can make groups of 10 first.

How many butterflies are there?

10, 20, 21, 22, 23, 24,  
25, 26, 27, 28, 29.

There are 29 butterflies.

## Tens and Ones

We can count and write numbers in tens and ones.  
This makes it easier to compare numbers greater than 10.

(a) Which is smaller, 24 or 20?

24 is 4 more than 20.

24 = 2 tens 4 ones

20 = 2 tens

20 is smaller.

(b) Circle the smallest number.  
Underline the greatest number.

15  
24  
20  
37

15 is 1 ten and 5 ones.

20 is 2 tens.

24 is 2 tens and 4 ones.

37 is 3 tens and 7 ones.

1 ten is the smallest.

15 is the smallest number.

3 tens is the greatest.

37 is the greatest number.

## Addition Within 40.

(a)  $24 + 3 = ?$

**Step 1:** Add the ones first.

Add 4 ones and 3 ones.

$$4 + 3 = 7$$

**Step 2:** Add 20 and 7.

$$20 + 7 = 27$$

So,  $24 + 3 = 27$ .

To add bigger numbers, we can make a 10 first.

(b)  $27 + 5 = ?$

**Step 1:** Add 27 and 3.

$$27 + 3 = 30$$

**Step 2:** Add 30 and 2.

$$30 + 2 = 32$$

So,  $27 + 5 = 32$ .

# Subtraction Within 40

(a)  $36 - 4 = ?$

We subtract the ones.

(b)  $36 - 8 = ?$

We cannot take away 8 ones from 6 ones.  
So, we take away from the tens.

$$\begin{array}{r} 36 \\ - 8 \\ \hline 26 \quad 10 \end{array}$$

## Adding Three Numbers

There are different ways to add three or more numbers.

(a)  $4 + 5 + 1 = ?$

Add 4 ones and 5 ones.

$$4 + 5 = 9$$

Then we add 9 and 1.

$$9 + 1 = 10$$

$$\text{So, } 4 + 5 + 1 = 10.$$

OR

$$4 + 1 = 5$$

$$5 + 5 = 10$$

$$4 + 5 + 1 = 10$$

(b)  $7 + 5 + 8 = ?$

We can make a 10 first.

Add 5 ones and 5 ones.

$$5 + 5 = 10$$

Next, we add 2 and 10.

$$2 + 10 = 12$$

Then we add 12 and 8.

$$12 + 8 = 20$$

$$\text{So, } 7 + 5 + 8 = 20.$$

We can add in any order:

$$7 + 5 + 8 = 20$$

$$8 + 5 + 7 = 20$$

$$5 + 7 + 8 = 20$$

numbers.

## Counting by 2's

This is how we count by 1's.

0, 1, 2, 3, 4, 5, ...

$$0 + 1 = 1$$

$$1 + 1 = 2$$

$$2 + 1 = 3$$

$$3 + 1 = 4$$

$$4 + 1 = 5$$

OR

$$0 + 1 = 1$$

$$1 + 1 = 2$$

$$1 + 1 + 1 = 3$$

$$1 + 1 + 1 + 1 = 4$$

$$1 + 1 + 1 + 1 + 1 = 5$$

This is how we count by 2's.

$$0 + 2 = 2$$

$$2 + 2 = 4$$

$$4 + 2 = 6$$

$$6 + 2 = 8$$

$$8 + 2 = 10$$

OR

$$0 + 2 = 2$$

$$2 + 2 = 4$$

$$2 + 2 + 2 = 6$$

$$2 + 2 + 2 + 2 = 8$$

$$2 + 2 + 2 + 2 + 2 = 10$$

0, 2, 4, 6, 8, 10, ...

Write these numbers in words.

44 — forty-four

55 — fifty-five

62 — sixty-two

74 — seventy-four

98 — ninety-eight

## Estimation

When we estimate, we make a reasonable guess how many of an object there are. To find out exactly how many there are, we count.

There are 10 stars in Jar A.

There are about 20 stars in Jar B.

## Comparing and Ordering Numbers

We compare 2-digit numbers by comparing the tens first, then the ones.

**54**

Tens	Ones
5	4

**34**

Tens	Ones
3	4

**90**

Tens	Ones
9	0

**59**

Tens	Ones
5	9

9 tens is greater than 3 tens and 5 tens.

90 is the greatest.

3 tens is smaller than 9 tens and 5 tens.

34 is the smallest.

If the tens are the same, we compare the ones.

54 is 5 tens 4 ones.

59 is 5 tens 9 ones.

9 ones is greater than 4 ones.

59 is greater than 54.

Arrange these numbers in order: 54, 34, 90, 59

Begin with the smallest: 34, 54, 59, 90

Begin with the greatest: 90, 59, 54, 34

We use the sign  $>$  to show that one number is **greater than** the other.

We use the sign  $<$  to show that one number is **less than** the other.

34

90

59

90 is greater than 34.

$90 > 34$

54 is less than 59.

$54 < 59$

## Addition Within 100

To add a 2-digit number and a 1-digit number, we can count on or add with number bonds.

$$72 + 4 = ?$$

Count on 4 ones from 72: 73, 74, 75, 76

**Step 1:** Add 2 ones to 4 ones.

$$2 + 4 = 6$$

**Step 2:** Add 70 and 6.

$$70 + 6 = 76$$

So,  $72 + 4 = 76$ .

We can also place the numbers one on top of the other and add as shown.

$$\begin{array}{r} 72 \\ + 4 \\ \hline 6 \end{array}$$

Add the ones.  
2 ones + 4 ones  
= 6 ones

$$\begin{array}{r} 72 \\ + 4 \\ \hline 76 \end{array}$$

Add the tens.  
7 tens + 0 tens  
= 7 tens

4 ones must be placed below 2 ones, not below 7 tens.

To add a 2-digit number and a 1-digit number, we can also make a ten first.

$$78 + 4 = ?$$

**Step 1:** Add 8 ones and 2 ones.  
 $8 + 2 = 10$

**Step 2:** Add 7 tens, 1 ten and 2 ones.  
 $70 + 10 + 2 = 82$

So,  $78 + 4 = 82$ .

$$78 + 4 = 70 + 10 + 2 = 82$$

To add two 2-digit numbers, we can add the tens first.

$$72 + 14 = ?$$

**Step 1:** Add 72 and 10.

$$72 + 10 = 82$$

$$72 + 14$$

**Step 2:** Add 82 and 4.

$$82 + 4 = 86$$

$$72 + 14 = 72 + 10 + 4$$

So,  $72 + 14 = 86$ .

We can also place the numbers one on top of the other and add as shown.

$$\begin{array}{r} 72 \\ + 14 \\ \hline 6 \end{array}$$

Add the ones.

2 ones + 4 ones

= 6 ones

$$\begin{array}{r} 72 \\ + 14 \\ \hline 86 \end{array}$$

Add the tens.

7 tens + 1 ten

= 8 tens

## Subtraction Within 100

To subtract a 1-digit number from a 2-digit number, we can count backwards or subtract with number bonds.

$$59 - 7 = ?$$

Count backwards 7 ones from 59: 58, 57, 56, 55, 54, 53, 52

**Step 1:** Subtract 7 ones from 9 ones.  
 $9 - 7 = 2$

**Step 2:** Add 5 tens and 2 ones.  
 $50 + 2 = 52$

So,  $59 - 7 = 52$ .

We can also place the numbers one on top of the other and subtract as shown.

$\begin{array}{r} 59 \\ - 7 \\ \hline 2 \end{array}$ <p>Subtract the ones. 9 ones - 7 ones = 2 ones</p>	$\begin{array}{r} 59 \\ - 7 \\ \hline 52 \end{array}$ <p>Subtract the tens. 5 tens - 0 tens = 5 tens</p>
---	--

To subtract a 1-digit number from a 2-digit number, sometimes we have to change 1 ten into 10 ones.

$$55 - 6 = ?$$

5 ones is less than 6 ones.

We cannot subtract 6 ones from 5 ones.

We change 1 ten into 10 ones.

**Step 1:** Subtract 6 from 15.

$$10 - 6 = 4$$

**Step 2:** Add 45 and 4.

$$45 + 4 = 49$$

So,  $55 - 6 = 49$ .

To subtract a 2-digit number from another 2-digit number, we can subtract the tens first.

$$54 - 23 = ?$$

**Step 1:** Subtract 20 from 54.

$$54 - 20 = 34$$

**Step 2:** Subtract 3 from 34.

$$34 - 3 = 31$$

So,  $54 - 23 = 31$ .

We can also place the numbers one on top of the other and subtract as shown.

$$\begin{array}{r} 54 \\ - 23 \\ \hline 1 \end{array}$$

Subtract the ones.

$$4 \text{ ones} - 3 \text{ ones}$$

$$= 1 \text{ one}$$

$$\begin{array}{r} 54 \\ - 23 \\ \hline 31 \end{array}$$

Subtract the tens.

$$5 \text{ tens} - 2 \text{ tens}$$

$$= 3 \text{ tens}$$

$$54 - 23$$

$$54 - 23 = 54 - 20 - 3$$

How much money is there?

Which set has a greater amount of money?

A

B

Set A has \$9.  
Set B has \$27.

We add the **value** of the bills in each set, and **not the number of bills** in each set.

Set B has a greater amount of money.

We add or subtract to find the cost of things or how much more they cost than others.

Gwen has \$15.

She wants to buy a doll and a toy drum.

- (a) Which costs more? How much more?
- (b) How much do the doll and toy drum cost altogether?
- (c) How much more money does Gwen need to buy the doll and the toy drum?

- (a) The doll costs more than the toy drum.

Subtract \$8 from \$10.

$$10 - 8 = 2$$

The doll costs \$2 more than the toy drum.

The toy drum costs \$2 less than the doll.

The doll is more expensive than the toy drum.

The toy drum is cheaper than the doll.

- (b)  $10 + 8 = 18$

They cost \$18 altogether.

- (c)  $18 - 15 = 3$

Gwen needs \$3 more.
